Arlington Custom Browser For Windows

Arlington Custom Browser (ACB) is a secure and customizable web browser, enabling it to be used for a wide range of purposes from full PC lockdown (eg. kiosk setup), regulated access to acceptable sites (eg. for businesses or schools), or to full internet access, or as a presentation tool (in public area, in a store, conference hall or in a lobby). Apart from restricted site access, some of the other configurable options include logging of web sites accessed, prevention of file downloads and the ability to customise the toolbar and include your company logo. Coupled with this flexibility, ACB can be tailor-made to suit your business. Here are some key features of "Arlington Custom Browser":
Optionally restrict web site access
Optionally lockdown PC (Start button, Taskbar, Ctrl-Alt-Del etc)
Logging of web sites visited
Customisable toolbar
Customisable address bar
Customisable favourites bar
User defined favourites
Centralised administration
Prevent launching of other programs
Inactivity timeout to home page
Prevent file downloads
Prevent popup windows
Password protected
Branding Requirements:
Intel Pentium processor; 200 MHz or faster recommended
64 MB RAM; additional memory recommended.
3 MB of available hard drive space
Limitations:
30-days trial

Arlington Custom Browser Crack + [April-2022]

Arlington Custom Browser (ACB) is a custom web browser based on Internet Explorer, and enables control over the configuration of the program. This includes: Access to some web sites, only once an hour; or, daily. Favourites/Bookmarks Log file details Block file downloads. Customize toolbar Customize address bar Button colours. Set default home page. Always have www. at the beginning of web address Customise favourites bar Remove favourites bar Set new options Closing (auto-session) Customise password (admin) Shut down. After downloading and launching the program, you will be asked to login to the admin (menu option) website. Here the you can create your ACB profile. After logging in, the program will look for the browser file, ".IE" in the "Documents and Settings" folder. On successful log-in, the browser configuration will be available to you. First you will need to create one or more folders for logging sites and they are usually located in the following folder: "Desktop" "Documents and Settings" "Cookies" "Start Menu" ACB documentation: Create a new profile (profile option) Select the "Internet Explorer" folder (the default option) Save the profile (OK) Optionally: the "Document location" (XD) folder can be selected Click the "Save" button Log in to ACB (Admin tool option) Click the "Window" menu Select "Profile Settings" Select "Create a new default profile". Your profile can now be saved. Log on to ACB. Click the "Window" menu. Select "Profile Settings". Click "Profile Manager". Select "Add a new profile". Select the "from default" option. You can then select a profile to load for future log on. Log out (Session option) Click the "Window" menu. Select "Profile Settings". Select "Logout". The logout option only closes the current session if it is active. If there are unsaved changes in the window, the logout option will not save them. After log out,
