If you've ever been to Fort Lauderdale, you may have heard of Love Field Airport, the first municipal airport in Florida. Located in South Florida at the time, it was intended to give travelers a more convenient way to reach the Atlantic coast. It was an early-20th-century example of the visionaries who were building a new kind of airport to serve the highways and railroads of the early 20th century. Today, with the advent of the Internet, airlines have decided that ground transportation is not needed for most flights. The airport is now used for occasional regional flights as well as industrial use. But it's important to note that the airport is still owned by the city and is still used to serve the city's population and commerce. As the site of the first municipal airport in Florida, it's important to look at how it's been transitioned to serve the needs of the community today. There are a few things to learn from this history, including how the airport has been reused for a variety of uses, from small business to military, as well as providing the runway for the 2014 NATO Summit, which used a temporary "temporary" airport. Since it's been reoccupied, several of the airport buildings have even been restored to their original glory for commercial or industrial use. Opinions of the United 2005 Decisions 3da54e8ca3
