Spectra is a lightweight and easy to use application that allows you to generate and convert gradients and color palettes. It provides support for multiple color spaces, including, RGB, HSV, SMY, RYB, CMYK and works with MAP, GRR and UGR files. The application can help you analyze and edit gradients and palettes and save the output to your computer. Spectra can be used with the various display drivers, the program offers you the following screens: the properties window, the color viewer and the gradient editor. The application can convert the gradient or palette and export it to Microsoft Visio, Adobe Photoshop, Corel Draw, Micrografx Paint Shop Pro, Paint Shop Pro X, Corel Painter 8, Photo-Paint, Ventura PhotoStudio, and Corel DRAW 7. It also supports the following file types: SVF/XCF/EMF/EPS/PDF (converts to SVG) PSD/PSB/PCD/PCT/PTC (converts to PICT) JPG/JPEG/PNG/BMP (converts to PSD) etc. NOTE: The program does not support gradient calculations.

---

The application can be used with the following versions: Windows 2000/XP/2003/Vista/2008/7/8... This is an article about SpectraColorLife is an article writing website you have already visited before? Cannot, come back to read, or the address does not match any of our editors? Privacy Policy Privacy Policy Terms of Service Legal Notice ok I'm back I've received your message unfortunately I am unable to help you, you'll have to contact the owner of the forums and ask him for help. Don't worry it doesn't mean I am ignoring you, I just can't do it. So go here: and click on CREATE NEW POST. That's really bad. Thank you for your kind attention. Thank you for your kind attention.Q: When will a direct question with a Yes/No answer be a good or bad idea? There are a couple of questions that seem like they may get some really easy answers. They fall into two categories: I know the answer will be "it depends" but can someone explain this to me (or point me to a deeper explanation)?

**What's New in the Spectra?**

---

Spectra is a graphical application that allows to analyze and modify color palettes and gradients. The program generates.grr and.map files, which can be used with Photoshop CS4 and Cs5. iProject Designer is a fully featured application which comes with all features you need to design high quality graphics. iProject Designer has been designed from scratch to be user friendly, with a very clean user interface. iProject Designer comes with basic and advanced toolbars, and a powerful built in workspace. Design your own unique web banner or business card with BICASoft Business Card Templates for Mac. It's easy to download, customize and print out your own personalized business card. You can even import your own photos. EasyImage is an Image Editor for Windows and OSX.It offers many standard operations such as resizing, rotation, cropping, recolouring, and so on.
