For the first time in its history, FIFA integrates ball physics modeling into the game's core engine, resulting in more realistic shots, passes, runs, and turn-ins. "With 'FIFA 22' we wanted to create a more immersive and connected experience with the new ball physics and visual technology," said Alex Ryan, vice president of product development at Electronic Arts. "By working closely with top brands like FIFA and adidas, FIFA can create the soccer experience you want." Adidas shares this sentiment, believing the integration of "TrueMotion Driven Running" will make a massive difference on the pitch, giving fans a more connected experience. There will be more customisation options for players when playing on-pitch, increasing the level of control for players and managers and providing a more dynamic experience. FIFA's Pitchside Reporter app will be expanded to provide a more in-depth look at all-new game features. Pitchside Reporter will feature a more visually-informative experience for new and long-time fans and an outlet for developers and brands to connect with the player base. FIFA 22 will be available for Xbox One and PC on September 27, 2017. View: FIFA 18 Gameplay 1080p, 30fps View: FIFA 18 Gameplay 4K, 60fps

While most margaritas typically have tequila as a dominant ingredient, a margarita can also be made with a vodka base (termed a vodka margarita), often in place of tequila. Other bases for a margarita are rum (mojito), gin (Gin & Tonic) or any other alcohol. Variations Originally, a margarita was traditionally made by mixing equal parts of tequila, lime or lemon juice and salt. However, other

What's new in Fifa 22:

- **The addition of vehicles will also allow players to overtake opponents and drive on the left side of the road; AI players will also know when to pass the ball to a teammate, while the new trailer speeds have been toned down.**

The new “Assisted Maneuvering” turning mechanics will give players new options to perform a shot or a pass when you’re on the run and defenders crowd around you, while variety of new long throws will give you more opportunities to win the ball and receive a quick free kick. Turn-based gameplay will also be crucial to help you create your own tactics and plan.

Making a free kick also quicker and easier than ever before. A quick flick of the left stick during a run will put your curling shot in any direction, while crosses can be feinted at any angle to surprise a goalkeeper.

New concepts throughout the game will encourage much more intelligent and interesting gameplay. Conditions such as rain will now match the phase of the ball based on how much contact each player has had, whether dribbling or running. Players will also display different animations when facing changes in pitch surface from icy climes to scorching deserts.

With new power animations that can be tweaked by the goalkeeper, players can now demonstrate emotion through every action. Highlight footage includes Wilson showing disdain for a bad tackle, Santos celebrating a goal with a Mexican wave, and Koke and Neymar looking distressed after a free kick that went astray.

FIFA Ultimate Team.
